SUMMARY

BS in Information Technology graduate, majoring in Web Systems Technology, with hands-on experience in web development, data analysis, and IT support. Currently working as a Junior IT Developer in a logistics company, contributing to system testing, enhancements, and development of internal solutions. Skilled in full-stack development, database management, and delivering practical systems that improve operational efficiency and user experience.

WORK EXPERIENCE

Junior IT Developer **December 2025 - Present**

- Provided IT support through a ticketing system, handling system maintenance and waybill updates.
- Supported system testing, maintenance, and ongoing development tasks.
- Developed small-scale systems and tools to improve operational efficiency and support business needs.

Freelance Web System Developer (Side Projects) **May 2024 - Present**

- Designed and developed small-scale management systems based on client requirements.
- Delivered remote technical support and guided clients in using deployed systems.
- Tracked and documented issues and resolutions using a structured, ticketing-style approach.
- Performed troubleshooting to maintain system reliability and usability.

Internship – LGU Gabaldon **February 2025 - May 2025**

- Developed and launched the Gabaldon Tourism Website to support local tourism initiatives.
- Provided basic IT support, including troubleshooting for computers, printers, and software.
- Assisted users with password resets, connectivity issues, and general technical concerns.
- Contributed to the development of a proposed web-based Payroll Management System.

EDUCATION

Bachelor of Science in Information Technology **August 2021 - June 2025**
Nueva Ecija University of Science and Technology – Gabaldon Campus

- Major in Web Systems Technology.
- Capstone Project: Barangay Information and Management System
